

# Membership eligibility

The EuroHealthNet Partnership consists of members and associate members.

- **Members** and national, regional or local institutions that have public mandates to work on health promotion, disease prevention, determinants of health, or health inequalities.
- Non-statutory bodies, such as universities, NGOs, and civil society organisations, can join the EuroHealthNet Partnership as **associate members** of one or more of our three Platforms (Policy, Research and Practice).

## Annual membership fees

- Our annual membership fees range from € 2,500 to € 20,000 for members.
- Based on the principles of transparency, solidarity and equity, members self-define the level of which they are able and willing to contribute to the Partnership.
- The annual membership fee for associate members is € 500 per platform.

## More information

For more information about membership, please contact David Hargitt via [d.hargitt@eurohealthnet.eu](mailto:d.hargitt@eurohealthnet.eu).

EuroHealthNet, the European Partnership for Health, Equity and Wellbeing, is a not-for-profit partnership of organisations, agencies and statutory bodies working on public health, preventing disease, promoting health, and reducing inequalities.

**Our mission is to improve and sustain health in Europe and to reduce health inequalities between and within European states through action on the determinants of health.**

EuroHealthNet activities take place across three platforms covering policy, practice, and research. EuroHealthNet supports members' work in EU and associated states through policy and project development, knowledge and expertise exchange, research networking, and communications.

EuroHealthNet  
**Membership**  
**Benefits**

# As a EuroHealthNet member, you will be able to

**1 Expand your expertise and network by participating in member-driven Country Exchange Visits** to examine how common issues are addressed in different national, regional and local contexts \*

**2 Build capacity for health promotion policies and interventions** through workshops, seminars, webinars, and knowledge-exchange activities

**3 Get opportunities to participate in European projects** with EuroHealthNet and other members of the Partnership and receive support in project applications

**4 Lead or participate in ad hoc Thematic Working Groups (TWIGs)** to develop joint actions with fellow experts in other countries \*

**5 Amplify your institution's messages and outputs** in our newsletters, online magazine, and social media channels, and through participation in our communications network \*

**6 Receive 'Network Intelligence'**, a members-only service that provides timely updates on relevant funding, policy consultation, collaboration and capacity-building opportunities \*

**7 Help set EuroHealthNet's strategic direction**, vote at General Council Meetings, and sit on the Executive Board \*

**8 Benefit from our monitoring and expert analysis of EU policies** affecting health and its determinants

**9 Engage in and help shape the EU policy-and decision-making processes**, for example through policy consultations and joint statement

**10 Provide health expertise to critical frameworks for European coordination and governance**, including the European Semester and the European Pillar of Social Rights \*

**11 Profit from our Finance Support Desk** and learn how to take advantage of European funding and technical support opportunities \*

**12 Help shape the EU research agenda** and stay informed of priorities within the EU Framework Programmes, such as Horizon Europe

**13 Participate in EU platforms and build alliances**, including with WHO Europe, civil society, and European networks

**14 Raise your visibility at major European event**, such as the European Public Health Conference, and speak at EuroHealthNet events

**15 Organise placements at EuroHealthNet**, allowing your staff to experience European public affairs first-hand, and use our office facilities for free \*

# And together we will be able to

- **Keep health equity** and the determinants of health **on the European agenda**
- Translate knowledge to policy makers and stakeholders and **promote evidence-based decision making across Europe**
- Increase collaborations between European public health institutions to **adapt to and tackle rising challenges of the 21st century**
- **Address the 'causes of the causes' through further cross-sectoral engagement** and a Health in All Policies and sustainable development approach
- **Stimulate an inclusive partnership** in which all members contribute according to their abilities and receive equal opportunities
- **Improve the sustainability of health systems** through investment in health promotion and disease prevention across the life course

\* Only available to members, not associate members
