

# EuroHealthNet External Evaluation

*Key takeaways from 2018-2021 and your suggestions for 2022-2025*

**Alison Maassen**

**Programme Manager**

EuroHealthNet General Council Meeting

1 June 2022

# Annual Evaluation Themes

2018-2021

Preliminary evaluation of  
EuroHealthNet events

Member satisfaction  
and engagement

Evaluation of policy impact  
(predominately EU level)

Alignment of public health  
policy priorities post-COVID

# EuroHealthNet's unique added value

1. A focus on evidence-based policy implementation in practice
2. A firm focus on public health rather than health care
3. An ability to unlock EU funding for members
4. Bridging the space between health and social policy

*“...[EuroHealthNet] is at such a level of professional and reputational maturity that there are no easy wins, only tough strategic choices of emphasis.”*

- Stephen Barnett, 2018-2021 external evaluator

# Where do we go from here?

- How do we maintain a reputation for solid scientific expertise in public health whilst campaigning for health equity?
- How do we balance alliance-building to reinforce our messages while protecting our distinctive niche?
- How much should we focus on social rights and social justice to frame our messaging on health equity?
- While we want to see ‘health in all policies’, how do we choose policy areas to prioritise?
