

THE PROMOTION OF PSYCHO-SOCIAL HEALTH: multidisciplinary, integrated and institutional approaches to prevent violent behaviours and support victims of violence

EuroHealthNet Country Exchange Visit

REGIONE
TOSCANA

From 9.00 on Thursday 24 October – 15.00 on Friday 25 October 2019

This event, hosted by the Tuscany Region, will focus on interpersonal violence, both how to prevent such violence and to support victims of violence. Violence manifests itself through multiple dimensions (physical, psychological, verbal, sexual, gender, peer, etc.) and contexts (family, work, school) in people's lives. Interpersonal violence is a risk factor for lifelong health and social problems. It is preventable and the health sector has an important role to play in preventing and responding to violence, as a part of a multidisciplinary and multi-sectoral approach.

During the visit we will discuss approaches and public prevention practices to address violence and behaviours that can lead to violence. The participants will share experiences on how to prevent recurrence of violence through early identification of people who are experiencing violence and violent perpetrators, as well as different ways of providing appropriate referral and support. We will also discuss how best to provide comprehensive services and to sensitize and train health care providers in responding to the needs of survivors holistically and empathetically. What is the support available in different countries to both victims and perpetrators of violence?

Programme day 1

8:30 Registration

Venue: Presidency of Tuscany Region, Piazza del Duomo 10, 20122 Florence

9:00 Welcome and Introductions

- *Katia Belvedere*, Head of office for legal advice and support to health research, Directorate for citizenship rights and social cohesion, Tuscany Region
